

JLG Forklift Parts

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove embarked on a cross country RV expedition. After spending numerous years establishing his family built crane company with his brother, John had no idea that this journey would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road expedition.

During their trip, John reacquainted himself with past business associates along the way. In combination with these conversations and a significant event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a substantial market for a product that could quickly and securely elevate people in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John established a joint venture with two friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they manufactured and sold the first JLG aerial work platform. The business incorporates some of the simple design essentials of that original lift into existing versions.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fateful cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has extended itself into many different global marketplaces and continues to develop modern machines to guarantee that customers are able to become safer and more resourceful within their workplace.
